

PRIVACY & DATA PROTECTION

Our top ranked Privacy & Data Protection practice is one of the longest-standing ones in Europe. We have been delivering solutions to the most challenging privacy challenges and enforcement actions since 1996.

We have substantial expertise in data protection compliance and audit projects on an international basis, which gives us an in-depth knowledge, excellent understanding of the law and hands-on experience. Our firm has substantial experience of data protection compliance and audit projects on an international basis, which gives us an in-depth knowledge, excellent understanding of the law and hands-on experience.

We assist clients in their data protection needs, including:

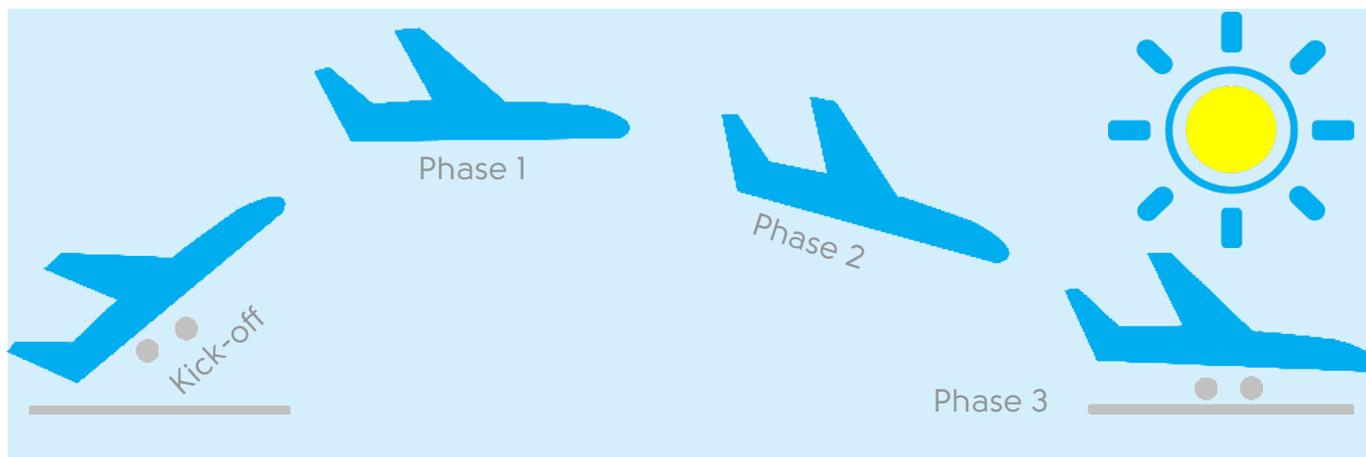

- Contentious Data Protection: defence against enforcement action brought by Supervisory Authorities and individual or collective claims, incl. compensatory redress actions (Article 82 GDPR)
- GDPR Strategic Planning and adaptation of privacy policies to the new GDPR principles
- Handling Data Breaches notifications
- Data Protection assessment and Privacy Impact Assessments (PIA)
- Data Protection Reviews and Security Audits (including Client Training)
- Whistleblowing reporting systems
- Big Data Projects and marketing partnerships (including loyalty programs)
- Transborder data flows

Our data protection reviews and data security audits methodology

When conducting our international Data Protection Reviews and Security Audits we co-counsel with local experts in every giving jurisdiction and take GDPR as “benchmark” together with other ISO/IEC and/or other International standards if necessary.

Phase 1 - Risk identification, preliminary assessment and mapping dataflows

- Record of processing activities/ "mapping"
- Review of existing policies, security document, BCP, data protection notices and other compliance tools (if any)

Phase 2 - Strategy and remedies

Drafting

- Policies
- Data Processing Agreements
- BCP
- Standard Contractual Clauses for International Transfer of Data
- PIAs

Amending

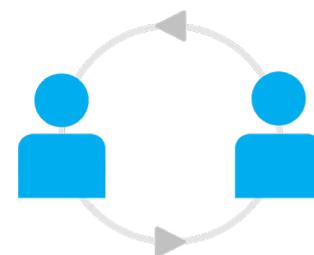

- Existing policies or data protection notices or other existing documents

Phase 3

Recommendations and Follow-up Actions.

Resources

- DPO (Data Protection Officer) appointment
- Mapping with suggested software vendors
- Training to employees
- Cybersecurity Risk Management Services
- Intrusion Tests with recommended vendors
- Data Breach mocks and training

Javier is widely recognized as one of the top specialists in privacy and data protection. He was among the pioneers in this field of law in 1990-s and is well known for defending private controllers before the Spanish DPA and relevant appeal Courts. He is expert in international transfer of data to third countries, outsourcing transactions and data protection review programs.

Paula is highly specialized in data protection and privacy and advised a large number of local and international companies on international data transfers, outsourcing transactions, and compliance and implementation programmes. She also advises clients on privacy issues related to blockchain projects.
